

NUPLAS™

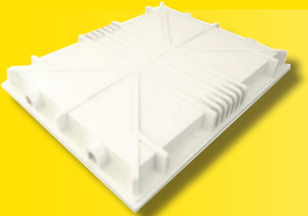

Plastic Bee Hives

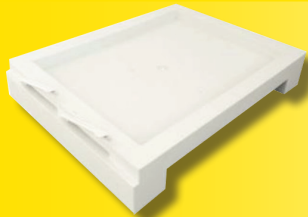

NEW 10 FRAME RANGE

Standard 10 Frame Lid. This lid is the standard Australian 10 frame dimensions and has air vents for ventilation. It is simply placed on top of your existing supers and strapped or clipped as required.

Rebated 10 Frame Lid. This lid is also the standard Australian 10 Frame dimension and has air vents, the difference being it is rebated on the edges to stop slipping and water penetration, this is standard for NZ.

Standard 10 Frame Deep Base. The new 10 frame base is to standard Australian 10 frame dimensions and has two entrances side by side. The depth inside the base is 27mm deep.

Standard 10 Frame Shallow Base. This standard base is also to Australian 10 frame dimensions and has two entrances side by side, you can have them both closed, both open or one open. The depth inside the base is 14mm deep.

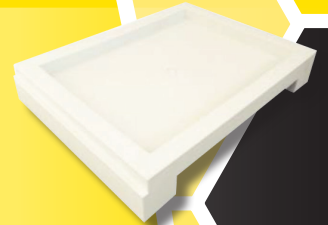

Vented 10 Frame Deep Base. The vented base is to the Australian 10 frame dimensions and has two entrances side by side. The vents help control condensation in the hive aiding in hive health and cleanliness. The depth inside the base is 27mm.

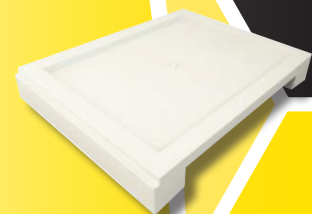

Vented 10 Frame Shallow Base. This vented base is to the Australian 10 frame dimensions and has two entrances side by side. The vents aid in hive hygiene and help control condensation. The depth inside the base is 14mm.

Deep 10 Frame Drip Tray. The drip tray is standard Australian 10 frame dimensions and is designed for bringing home supers full of honey. All excess honey that drips into the base is easily removed from the base as there is no entrance.

Shallow 10 Frame Drip Tray. This drip tray is also to Australian 10 frame dimensions and is designed for bringing home supers full of honey. Any honey that drips into the base is kept and removed when you get home.

Ideal Supers. The new ideal supers are to Australian 8 and 10 frame dimensions. They have scalloped handles and are as sturdy as our full depth boxes. Forget all the work involved in timber supers and grab the Nuplas hives.
